

PROJECT DESCRIPTION

The COVID-19 crisis has heavily accelerated the need for a digital transformation in the educative and training systems across Europe, but there are still many limitations in terms of e-teaching and more training in this field is needed. As a result, the project IKSE aims at supporting the process of recovery from the COVID-19 pandemic and demonstrate responsiveness, adaptability, and flexibility, contributing to building digital education readiness and to mitigating the impact of the crisis on education.

Consequently, IKSE will focus on building capacity to implement online, blended, and distance teaching and learning; to develop digital pedagogical competences of VET Actors, Professionals and End Users enabling them to deliver high quality inclusive digital education. Moreover, it will support them in using high-quality digital content such as innovative online resources and tools in the field of Social Entrepreneurship.

OUTPUTS

1 Toolbox

2 E-learning Training Course for E-learning Designers and VET Key Actors

3 Piloting the System: 4 Drivers for Social Entrepreneurship Key Competencies

4 E-Learning Platform Set Up and Learning Materials Production (for IO 2 and 3)
